

WIRELESS GLASS BREAK SENSOR

Indoor/ Smart Building

The glass break sensor uses a microphone to detect glass breakages based on sound.

When a glass breakage is detected, an alert is sent over the wireless network.

Compatible with third-party LoRaWAN compliant gateways and network servers.

FEATURES

- Built-in radio that talks directly with the LoRaWAN wireless network
- Two types of tamper detection: enclosure Tamper and wall mount tamper
 - Enclosure tamper
 - Wall mount tamper detects (indoor version)
- 200,000 + transmissions on a single battery and a 5-10 year battery life depending on usage
- User replaceable battery
- Fully integrated internal antenna
- Over the air sensor configuration in the field
- Automatic low battery reporting and super (sensor health) reporting

APPLICATIONS

- Window break detection for hotels, homes, and public buildings
- General purpose glass break sensing
