

WIRELESS SINGLE PUSH BUTTON

The single push button sensor can be used as a panic button, PERS, remote control, or other remote push button applications. When the button is pressed, a message is sent over the wireless network. Versions of the sensor support the major LPWAN standards such as Sigfox, LoRa/LoRaWAN, and SubGig.

Features

- Built-in radio that talks directly with the wireless network*. Standards include:
 - Sigfox®
 - LoRa®/LoRaWAN™
 - SubGig®
- 20,000-1,000,000+ transmissions on a single battery and a 5-10 year battery life depending on usage
- User replaceable battery
- Fully integrated internal antenna
- Over the air sensor configuration in the field
- Automatic low battery reporting and supervisory (sensor health) reporting

Applications

- Panic or emergency alert
- Silent alarm for hospitality employees
- Silent alarm for retail counters and gas stations
- Security guard alert
- Remote control
- Personal Emergency Response (PERS) for seniors and healthcare facilities
- General remote push button applications
